URODYNAMIC TESTING

Your physician has ordered Urodynamic Testing. These are bladder function tests which determine how well your urinary bladder is functioning.

It is very important that you have a full bladder at the time of your test. You should attempt to drink 6 to 8, 8 ounce glasses of fluid, one and a half hour prior to your arrival. There is no special preparation for these tests. Eat a light breakfast or lunch before your appointment.

If you have any questions regarding your tests, or if you need to cancel or change your appointment for any reason, please call our office at (309) 664-6949.
